Reasons for Allowance

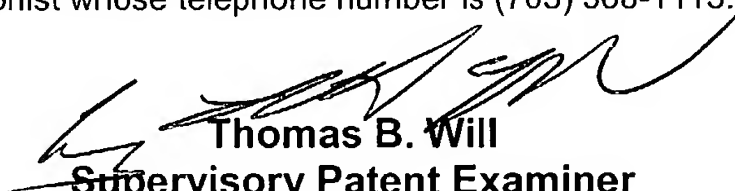

The following is an examiner's statement of reasons for allowance: Goodrich et al (US 5,556,900) discloses a polymer-linked asphalt and a process for making it, with Table V disclosing the closest prior art in a patent, detailing the beam fatigue life of asphalt at 25 degrees C, though the initial beam microstrain is *not* at 2000. Goodrich therefore does not disclose all of the elements of an interlayer having a flexural beam fatigue of at least about 100,000 cycles at 2000 microstrains, 10Hz, 2-4 percent air voids, and a temperature of about 10-30 degrees C. The closest prior art is the New York State Dept. of Transportation file "Reflective Crack Relief HMA Interlayer", though this is dated 8/7/02 which is after the filing date of the applicant's parent application filed 6/27/01.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
